## Brief summary

I've started my career in 2008 as a junior network administrator and it gave me a fundamental background in the IT world but in CV mentioned only the latest 5 years which I believe left me the freshest knowledge. Very interested to explore unknown barriers in the IT world and I'm keen to dive into SRE related world.

## Work Experience

---

*Current*
April 2020

**Barclays Investment Bank**, Prague, Czech Republic
*System Engineer*

SRE and DevOps duties for Barclays
- After spliting between EPAM and BC Iâve decided to stay in same project in order to continue my journey with the team and new challenges. Put all my passion into the project, share my experience and most importantly to learn new things from more experienced colleagues around me. Performing SRE and DevOps duties for various internal applications. - Hight level application managemnt
